SUMMARY

Final-year Software Engineering student (graduating 12/2026) seeking a Backend Intern position. Completed a backend internship at HINNOVA building REST APIs with .NET 8, JWT and Swagger, and researching local LLM integration (LLaMA 3, LLaVA). Built and deployed Django REST Framework projects with OAuth login, payment gateway integration and AWS EC2 deployment, and led a 4-person team on a full-stack capstone project.

TECHNICAL SKILLS

Languages: Python, C#, SQL
Backend: Django, Django REST Framework, FastAPI, ASP.NET Core Web API / MVC, Entity Framework Core
Databases: PostgreSQL, MySQL, SQL Server, MariaDB
Auth & APIs: REST API design, JWT, OAuth 2.0 (Google, Facebook), OTP verification, Swagger / OpenAPI
DevOps & Tools (Basic): AWS EC2, Nginx, Gunicorn, Docker / Docker Compose, Linux, Git, GitHub, Postman
Frontend (basic): React, HTML, CSS

EXPERIENCE

HINNOVA | *Backend Intern* 03/2026 – 05/2026

- Built REST APIs in .NET 8 Web API with Entity Framework Core and SQL Server for an AI-assisted emergency department triage platform, serving both the frontend and backend modules.
- Configured JWT authentication and documented the API with Swagger / OpenAPI.
- Researched and tested local AI integration with LLaMA 3 and LLaVA (via Ollama) for predicting patient acuity from clinical data and chest X-rays.
- **Code:** github.com/duong-quoc-huy/TriageSystem

PROJECTS

MediCare: Family Doctor Booking & Medicine Delivery Platform | Django, React, PostgreSQL

- Led a 4-person team; built most of the REST API backend, including a custom user model, multi-role authentication, and OTP verification.
- Implemented an appointment slot engine for home-visit doctor booking and designed the PostgreSQL schema (hosted on Aiven), including Vietnamese administrative address models.
- Integrated payment with VNPay and Paypal. Stimulated successfully the QR Payment function.
- Stimulated the shipping services and management the shipping status.
- **Code:** github.com/duong-quoc-huy/MediCare-Platform

IoT RFID Attendance System | *Django REST Framework, PostgreSQL, ESP32*

- Built an end-to-end system: an ESP32 + RFID RC522 device sends attendance records through a REST API to a Django backend, with a web dashboard for monitoring and reports.
- Used a cloud PostgreSQL database (Aiven) over SSL and deployed on AWS EC2 with Nginx and Gunicorn.
- **Code:** github.com/duong-quoc-huy/Check-Attendance-IOT-Project

E-commerce Web Application | *Django REST Framework, MySQL*

- Implemented cart, checkout, order and payment status tracking, with VNPay and PayPal (sandbox) payment integration and Google / Facebook OAuth login.
- Deployed on AWS EC2 (Ubuntu) with Nginx, Gunicorn and a custom domain; used a cloud MySQL database (Aiven) over SSL.
- **Code:** github.com/duong-quoc-huy/Fundamental-Ecommerce-Project

EDUCATION

Nguyen Tat Thanh Institute of International Education | *B.Sc. Software Engineering, IT Faculty*
2022-2026

- GPA: 3.46 / 4.0

Hung Vuong Technology Vocational School | *Vocational Diploma in Network Administration* 2019 – 2022
